

Saskatchewan Sheep Development Board

Marketing Services Fact Sheet

The Saskatchewan Sheep Development Board provides a marketing option to assist producers in achieving their marketing goals.

SSDB Marketing Service Advantages:

- ❖ Provides lamb producers exposure to buyers across the country, providing a competitive marketing environment.
- ❖ Producers know the feeder lamb, market lamb and slaughter sheep prices prior to shipping animals.
- ❖ Producers have regular shipping opportunities.
- ❖ We take the stress out of marketing.
- ❖ SSDB is a bonded licensed dealer.

SSDB Marketing Service Fees:

Handling \$2.00 - \$2.50 per head depending on volume. All goats \$2.50 per head.

Insurance \$0.50

Assembly Point Yardage \$2.00-\$3.50 dependent on local assembly yard fees.

SSDB Marketing Service Procedure

1. The producer calls the SSDB office and provides the following information:
 - ❖ Number and type of animal
 - ❖ Approximate weight or weight range of animal(s).
 - ❖ Birth month/s
 - ❖ Breed of animal.
 - ❖ If male lambs are castrated.
 - ❖ If lambs are on a grain ration
2. When the SSDB office has a suitable number of animals on offer from producers:
 - ❖ A bid sheet with information on animals being offered is sent to the buyers.
 - ❖ The buyers are generally given 48 hours to respond with bid. The successful buyer is contacted as soon as the bidding closes.
3. Arrangements are made with the buyer for trucking and assembly. A truck is normally sent to the assembly point if there is a minimum number of 100 head.
4. Producers are then contacted and provided a bid price and asked to confirm commitment to shipping and numbers being committed. Producers are instructed to bring their animals to the assembly point on a specific day and by a certain time. The animals are weighed, and weight is recorded on the manifest. Producers are paid on recorded weights regardless of destination.
Note: price quoted is based on quality animals, poor quality animals are discounted.
5. Producers are required to put a unique identifying mark on their animals for ease of identification.
6. The truck picks up the animals and the load information is sent to the buyer. The buyer then forwards payment to the office and a cheque is issued to the producer, normally within three business days. Depending on mail services and producer location payment should be received within one to two weeks.
7. The current assembly points are located at **Saskatoon, Melville, Tisdale, Craven, Maple Creek, and Swift Current**. The volume at assembly location must be enough to warrant sending a truck for pick up.

Note: We are always looking for additional locations for assembly if there is enough demand and criteria can be met.

8. The SSDB office must be notified of any changes to the committed number of sheep/lambs to be delivered to the assembly point asap. Freight is a substantial cost; loads must be full, and space has been reserved for your animals. Our expectation is that producers will maintain their commitment to the SSDB and other producers in the province.

9. If a producer has called the office to put animals on offer, the office must be notified if the situation changes, and the animals are no longer on offer. If the office is not notified of the change your animals will be included on the bid sheet, resulting in an inaccurate offering to the buyers.

SSDB Large Volume Option

Producers with a larger number of lambs available for sale at one time (normally 150 or more) can request their lambs be offered for bid as a single owner group. Buyers will then be bidding only on the individual producer's lambs. This option may include a farm pick up. Farm pick up is dependent on location, arrangements made to determine weight of animals and the number of animals offered. Shrink may apply on a farm pick-up.

SSDB Breeder Option

Producers selling breeding stock can request the SSDB's assistance in facilitating the sale. The buyer of the breeding stock will be required to deposit with the SSDB the total funds for the purchase. Funds will be held until breeding stock is delivered to the buyer. When seller and buyer agree that everything is in order, proceeds of the sale will be released to the seller.

When Shipping to Any Market:

- ❖ All animals must be tagged with approved CSIP tag before they leave the farm.
- ❖ Know the estimated weight of the animals being offered or delivered.
- ❖ Prevent ewe lambs from being bred, bred ewe lambs are difficult to manage for feedlot operators.
- ❖ Prevent cull ewes from being bred.
- ❖ Castrate ram lambs unless you are shipping prior to sexual maturity, direct to slaughter or a niche market. Feeder ram lambs are difficult to manage in feedlot operations.
- ❖ Dock tails as you may be discounted, as it potentially can lead to animal health issues and plant contamination.
- ❖ Ship all OLD CROP lambs before adult teeth emerge, once adult teeth emerge these animals are classified as culls and hence will receive cull price.
- ❖ Sort or mark your lambs according to their weight categories and if possible separate them on the trailer. This helps with movement, less stress on your animals once you get to the assembly point.
- ❖ Send a completed livestock manifest with the animals. Indicate the PID number, type and number of animals and identifying mark if applicable.
- ❖ Follow Canadian Livestock Transportation Regulations
- ❖ Keep animals on feed and water animals before leaving home.
